**What this is.** An AI shopping assistant reading this product page can only use what the page actually states in a machine-readable form. Each requirement below is a question a buyer asks; the test reports whether the page answers it, and quotes the sentence that did. **“Not stated” is a statement about the page, not about the product.** It does not mean the product lacks the property, and nothing here is a criticism of it.

## The 3 most material findings

*Selection rule: unmet requirements first, ranked by how many comparable stores DO state the same thing (the widest peer gap first); where two are equal, the one a stranger can check on the fewest surfaces comes first. Nothing here is hand-picked.*

### FINDING 1 · NOT STATED ON THE PAGE

#### An organic claim is stated in readable text

Checked product copy, structured data, product title, variant options and page description — no statement an AI buyer could verify.

92 of 100 coffee stores don't state this either.

**Check it:** Open <https://klatchcoffee.com/products/ethiopia-yirgacheffe-supernatural> and look at product copy, structured data, product title, variant options, page description. The claim is that nothing there settles this question — one sentence anywhere on those surfaces would.

Requirement [ALS-COFFEE-1.3-CERT-001](#) of the published standard.

-----

## FINDING 2 · NOT STATED ON THE PAGE

### Ground option is listed and purchasable

Checked the public variant list — no "Ground" variant found.

92 of 99 coffee stores don't state this either.

**Check it:** Open <https://klatchcoffee.com/products/ethiopia-yirgacheffe-supernatural> and look at variant options. The claim is that nothing there settles this question — one sentence anywhere on those surfaces would.

Requirement [ALS-COFFEE-1.3-FORMAT-002](#) of the published standard.

---

## FINDING 3 · NOT STATED ON THE PAGE

### A fair-trade scheme claim is stated in readable text

Checked product copy, structured data, product title, variant options and page description — no statement an AI buyer could verify.

96 of 100 coffee stores don't state this either.

**Check it:** Open <https://klatchcoffee.com/products/ethiopia-yirgacheffe-supernatural> and look at product copy, structured data, product title, variant options, page description. The claim is that nothing there settles this question — one sentence anywhere on those surfaces would.

Requirement [ALS-COFFEE-1.3-CERT-002](#) of the published standard.

## Provenance

---

- Full result, permanent and unchanging: [http://127.0.0.1:8787/result/t\\_a7060bfdd703961be238](http://127.0.0.1:8787/result/t_a7060bfdd703961be238)
- The standard this ran, versioned and content-hashed: <http://127.0.0.1:8787/standards/coffee/1.3>
- Method: <http://127.0.0.1:8787/methodology>
- Engine [v2.4.0](#) · contract [c1s-f3967d50](#)

Measured false-pass rate of the engine that produced this, executing ALS-COFFEE v1.3 on 100 real coffee products across 77 storefronts: 4.38% point estimate, 9.99% 95% upper bound, over 160 passing rows each read individually. It is the rate at which this engine calls a requirement proven when the evidence does not support it — not a confidence score for any row above, and not a claim about klatchcoffee.com.

The store did not ask for this test and has no involvement in it. The page may have changed since 2026-07-27; the permanent link above states the date it was read.
